

Measurement - Comparing Sizes

Chapter 5: Measurement - Comparing Sizes · Topic 1

Key Concept

We use comparison words like 'bigger' and 'smaller' to describe the size difference between two objects.

'Taller' and 'shorter' help us compare heights, like comparing how tall two people or objects are.

'Longer' and 'shorter' help us compare lengths, like comparing two pencils or ribbons.

'Heavier' and 'lighter' help us compare weight, like comparing a book and a feather.

Quick Revision Notes

- Bigger/smaller compare size.
- Taller/shorter compare height.
- Longer/shorter compare length.
- Heavier/lighter compare weight.
- We use these words for comparison.
- Comparing objects builds understanding.
- This is a basic measurement skill.
- Practice helps identify differences easily.

Practice Questions

- 1 Compare two objects and say which is bigger.
- 2 Compare your height with a friend's.
- 3 Compare the length of two pencils.
- 4 Compare the weight of two objects by holding them.
- 5 Draw a big object and a small object.
- 6 List three things that are heavier than a pencil.
