

Practising The Computer Lab and Its Rules

Chapter 5: The Computer Lab and Its Rules · Topic 2

Key Concept

We should not eat or drink near the computers, as spills can damage them. We should not touch the screen with dirty or wet hands.

We should sit properly on our chair and handle the mouse and keyboard gently, without banging them.

We should also keep our voice low in the computer lab, so we do not disturb others who are working or learning nearby.

Following these lab rules helps keep the computers working well for a long time and creates a good learning environment for everyone.

Quick Revision Notes

- Do not eat or drink near computers.
- Do not touch the screen with dirty or wet hands.
- Sit properly in the computer lab.
- Handle the mouse and keyboard gently.
- Keep your voice low in the computer lab.
- Low noise helps others work and learn.
- Following lab rules keeps computers working well.
- Good lab behaviour creates a good learning environment.

Practice Questions

- 1 List three rules of the computer lab.
- 2 Explain why we should not eat near computers.
- 3 Practice sitting properly at a computer desk.
- 4 Discuss lab rules with your classmates.
- 5 Practice speaking quietly while doing lab work.
- 6 Make a small poster of computer lab rules.
