

Numbers up to 10,000

Chapter 1: Numbers up to 10,000 · Topic 1

Key Concept

Numbers up to 10,000 have four place values - thousands, hundreds, tens, and ones - like 3,452 having 3 thousands, 4 hundreds, 5 tens, 2 ones.

We can write numbers using numerals (3,452) and words (three thousand four hundred fifty-two), important for reading and writing.

Numbers have an order, so we can arrange them from smallest to largest, or compare which number is bigger using place value.

Practising numbers up to 10,000 builds a strong foundation for understanding even larger numbers in the future.

Quick Revision Notes

- Numbers up to 10,000 have 4 place values.
- Thousands, hundreds, tens, ones.
- $3,452 = 3$ thousands, 4 hundreds, 5 tens, 2 ones.
- Numbers written as numerals and words.
- Numbers have an order.
- We compare using place value.
- This builds foundation for larger numbers.
- Practice strengthens number sense.

Practice Questions

- 1 Write the numbers 1,000 to 1,050.
- 2 Identify the place values in 7,364.
- 3 Write 4,821 in words.
- 4 Compare 5,647 and 5,674, saying which is bigger.
- 5 Arrange 2,345, 4,567, 1,234 from smallest to largest.
- 6 Write the number with 6 thousands, 0 hundreds, 4 tens, 8 ones.
