

Money - Recognising Coins

Chapter 6: Money - Recognising Coins · Topic 1

Key Concept

Coins come in different values, like 1 rupee, 2 rupees, 5 rupees, and 10 rupees, each having a different size and design.

We use money to buy things we need, like food, toys, and books, exchanging coins or notes for items.

It's important to recognise the value written on each coin so we know how much it is worth.

Learning about money helps us understand basic buying and selling, an important life skill for the future.

Quick Revision Notes

- Coins have different values: 1, 2, 5, 10 rupees.
- Each coin has a different size and design.
- We use money to buy things.
- We exchange coins/notes for items.
