

Reading and Understanding 'Alphabet and Phonics'

Chapter 1: Alphabet and Phonics · Topic 1

Key Concept

The English alphabet has 26 letters, from A to Z, each with an uppercase and lowercase form.

Phonics teaches us the sound each letter makes, like 'a' making the sound in 'apple' or 'b' making the sound in 'ball'.

Learning letter sounds helps us sound out and read new words we haven't seen before.

Practising the alphabet and phonics regularly helps build a strong foundation for reading and writing.

Quick Revision Notes

- The alphabet has 26 letters, A to Z.
- Letters have uppercase and lowercase forms.
- Phonics teaches the sound each letter makes.
- 'A' sounds like in 'apple'.
- 'B' sounds like in 'ball'.
- Letter sounds help us read new words.
- Practice builds a strong reading foundation.
- Phonics is important for early reading.
