

Members of My Family

Chapter 1: My Family · Topic 1

Key Concept

A family usually includes parents (mother and father), and may include siblings (brothers and sisters), and sometimes grandparents, uncles, aunts, and cousins who live together or nearby.

A family where parents, children, and grandparents live together is called a joint family, while a family with just parents and children is called a nuclear family.

Each family member has a special relationship with us and plays an important role, like parents taking care of us, and grandparents sharing their experience and love.

Learning the names of family members and understanding their relationships to us helps us appreciate and respect our family.

Quick Revision Notes

- A family includes parents, siblings, and sometimes grandparents.
- A joint family includes grandparents living together.
- A nuclear family includes just parents and children.
- Each family member has a special role.
- Parents take care of us.
- Grandparents share experience and love.
- Family members support and love each other.
- Knowing family relationships helps us respect our family.

Practice Questions

- 1 Draw your family and label each member.
- 2 Name three family members and their relationship to you.
- 3 Ask your parents about your grandparents.
- 4 Talk about one thing you love about your family.
- 5 Make a simple family tree.
- 6 List the differences between a joint family and a nuclear family.
