Practice Questions

1. **Identify the problem.** The first step is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.
2. **Define the objectives.** Once the problem is identified, the next step is to define the objectives or goals that need to be achieved. This involves setting clear, measurable, and achievable targets.
3. **Develop a plan.** The third step is to develop a plan or strategy to address the problem. This involves identifying the resources needed, the steps to be taken, and the timeline for completion.
4. **Implement the plan.** The fourth step is to implement the plan. This involves putting the plan into action and monitoring progress to ensure that the objectives are being met.
5. **Evaluate the results.** The fifth step is to evaluate the results of the implementation. This involves comparing the actual outcomes with the objectives and identifying any gaps or areas for improvement.
6. **Communicate the findings.** The final step is to communicate the findings of the evaluation. This involves sharing the results with the relevant stakeholders and providing recommendations for future action.
