

Water Around Us

Chapter 2: Water Around Us · Topic 1

Key Concept

We find water in rivers, lakes, oceans, and rain, and it is important to keep these water sources clean.

We use water every day for drinking, cooking food, washing clothes, and bathing to stay healthy.

Water is also very important for plants and animals, helping them grow and survive.

We should not waste water and should use it carefully, since clean water is a precious resource.

Quick Revision Notes

- Water is found in rivers, lakes, oceans and rain.
- We should keep water sources clean.
- We use water for drinking and cooking.
- We also use water for washing and bathing.
- Water helps plants and animals grow.
- We should not waste water.
- Water is a precious resource.
- We must use water carefully.

Practice Questions

- 1 List five ways you use water every day.
- 2 Discuss why we shouldn't waste water.
- 3 Draw a picture of a water source, like a river.
- 4 Talk about how to save water at home.
- 5 Explain why water is important for plants.
- 6 Discuss what happens if water becomes dirty.
