

Numbers up to 100

Chapter 1: Numbers up to 100 · Topic 1

Key Concept

We can count in tens - 10, 20, 30, up to 100 - to help us count larger groups of objects quickly.

Numbers up to 100 have a tens digit and a ones digit, like 45 having 4 tens and 5 ones.

We can compare numbers up to 100 to see which is bigger or smaller, like 67 being bigger than 45.

Practising counting, reading, and writing numbers up to 100 helps build a strong foundation in mathematics.

Quick Revision Notes

- Numbers up to 100 help us count larger groups.
- We can count in tens: 10, 20, 30, up to 100.
- Numbers have a tens digit and a ones digit.
- 45 has 4 tens and 5 ones.
- We can compare numbers to find bigger or smaller.
- 67 is bigger than 45.
- Practice helps us count and write numbers well.
- This builds a strong maths foundation.

Practice Questions

- 1 Count from 1 to 100 by tens.
- 2 Write the numbers 90 to 100 in order.
- 3 Compare two numbers and say which is bigger.
- 4 Identify the tens and ones digits of 78.
- 5 Count 50 objects around your house.
- 6 Practice writing five two-digit numbers.
