

Practising Cyber Safety and Digital Citizenship

Chapter 7: Cyber Safety and Digital Citizenship · Topic 2

Key Concept

Staying cyber safe includes not sharing personal information (like your address or school name) with strangers online, using strong passwords, and being cautious of suspicious links or messages.

Being a good digital citizen means treating others with respect online (no cyberbullying), respecting others' privacy, and thinking before posting or sharing content.

Quick Revision Notes

- Cyber safety means protecting yourself online.
- Never share personal information with strangers online.
- Use strong passwords.
- Digital citizenship means using technology responsibly and respectfully.
- Avoid cyberbullying and respect others' privacy online.

Practice Questions

- 1 List three rules for staying safe online.
- 2 Explain what cyberbullying is and why it's harmful.
- 3 Create a strong password example (without using a real one) and explain why it's strong.
- 4 Discuss what makes someone a good digital citizen.
