

Public Facilities and My School

Chapter 8: Public Facilities and My School · Topic 1

Key Concept

Public facilities are services and places available for everyone in the community, like hospitals, parks, libraries, and schools.

Our school provides education, along with facilities like a library, playground, and laboratory to support all-round development.

Using public facilities responsibly, like keeping them clean and following rules, helps them remain useful for everyone.

Appreciating and taking care of public facilities, including our school, helps build a better community for all.

Quick Revision Notes

- Public facilities serve the whole community.
- Examples: hospitals, parks, libraries, schools.
- School provides education plus facilities.
- Facilities: library, playground, laboratory.
- These support all-round development.
- Use facilities responsibly, keep them clean.
- This keeps them useful for everyone.
- Caring for them builds a better community.

Practice Questions

- 1 List three public facilities in your area.
- 2 Discuss the facilities available at your school.
- 3 Discuss why keeping public facilities clean matters.
- 4 Draw your school's library or playground.
- 5 Discuss one rule you follow at a public facility.
- 6 Discuss how public facilities help your community.
