

Animals Around Us

Chapter 4: Animals Around Us · Topic 1

Key Concept

Pets, like dogs and cats, live with us at home and need food, water, and care from their owners.

Farm animals, like cows and hens, give us useful things like milk and eggs, and live on farms.

Wild animals, like tigers and elephants, live in forests and need to find their own food and shelter.

All animals need food, water, air, and a safe place to live, just like we do.

Quick Revision Notes

- Animals are living things around us.
- Pets like dogs and cats live with us at home.
- Pets need food, water and care.
- Farm animals like cows and hens live on farms.
- Farm animals give us milk and eggs.
- Wild animals like tigers live in forests.
- Wild animals find their own food and shelter.
- All animals need food, water, air and shelter.

Practice Questions

- 1 Name three pets, three farm animals and three wild animals.
- 2 Draw your favourite animal.
- 3 Discuss what a pet at home needs.
- 4 Talk about an animal you saw at a farm or zoo.
- 5 Explain why wild animals live in forests.
- 6 List what all animals need to survive.
