

Our School Environment

Chapter 4: Our School – A Happy Place · Topic 1

Key Concept

Classrooms provide a space for structured learning, while playgrounds offer space for physical activity and social interaction during breaks.

Libraries provide access to books and resources that support learning beyond the classroom, encouraging reading and research skills.

A clean, safe, and well-maintained school environment helps students feel comfortable and supports better learning and health.

Everyone at school - students, teachers, and staff - shares responsibility for keeping the school environment positive, clean, and conducive to learning.

Quick Revision Notes

- Classrooms provide structured learning spaces.
- Playgrounds offer physical activity space.
- Libraries provide books and learning resources.
- A clean environment supports better learning and health.
- Everyone shares responsibility for the school environment.
- Students, teachers and staff all contribute.
- A safe environment helps students feel comfortable.
- School facilities support different aspects of growth.

Practice Questions

- 1 List the facilities in your school and their purpose.
- 2 Discuss one way you help keep your school environment clean.
- 3 Draw a map of your school showing key areas.
- 4 Discuss why libraries are important for learning.
- 5 Talk about your favourite part of your school environment.
- 6 Suggest one improvement for your school environment.
