

Clothes - Our Necessity

Chapter 17: Clothes - Our Necessity · Topic 1

Key Concept

Clothes protect our bodies from heat, cold, rain, and sun, making them a basic necessity for comfort and health.

Different fabrics like cotton, wool, and silk have different properties, suited for different weather conditions and occasions.

Clothing also reflects our culture and traditions, with different regions having unique traditional garments and styles.

Understanding clothing materials and their care helps us make appropriate choices and maintain our clothes for longer use.

Quick Revision Notes

- Clothes protect from heat, cold, rain, sun.
- They are a basic necessity.
- Fabrics: cotton, wool, silk have different properties.
- Each suits different weather/occasions.
- Clothing reflects culture and traditions.
- Different regions have unique garments.
- Understanding materials aids good choices.
- Proper care extends clothes' life.

Practice Questions

- 1 Discuss why clothes are a basic necessity.
- 2 List three fabric types and their uses.
- 3 Draw a traditional clothing item from your culture.
- 4 Discuss why we wear different clothes in different seasons.
- 5 Discuss how to care for your clothes.
- 6 Compare clothing worn in hot and cold regions.
