

Myself and My Family

Chapter 1: Myself and My Family · Topic 1

Key Concept

My family includes people like my mother, father, brothers, and sisters, who all live together and care for each other.

Grandparents, uncles, and aunts are also part of our extended family, and we enjoy spending time with them.

Every family member has a role, like parents caring for children, and family members help and support each other.

We should respect and love our family members, and thank them for the care they give us.

Quick Revision Notes

- Our family includes parents, siblings and relatives.
- Family members live together and care for each other.
