

Transport and Communication

Chapter 9: Transport and Communication · Topic 1

Key Concept

Transport includes methods like walking, cycling, cars, buses, trains, and airplanes, each suited for different distances and needs.

Communication includes methods like talking, writing letters, using telephones, and modern methods like emails and video calls.

Modern transport and communication technologies have made travelling and sharing information faster and easier than in the past.

Understanding the evolution of transport and communication helps us appreciate technological progress and its impact on our lives.

Quick Revision Notes

- Transport: walking, cycling, cars, trains, planes.
- Different methods suit different distances.
- Communication: talking, letters, phones, emails.
- Modern tech includes video calls.
- Modern transport/communication is faster.
- This is easier than in the past.
- Technology has evolved significantly.
