

Recognising Coins

Chapter 12: How Much Can We Spend? · Topic 1

Key Concept

Indian coins come in different sizes, colours, and designs, and each coin has a number printed on it showing its value, like '1', '2', '5', or '10'.

We can recognise a coin by looking at its size, the number written on it, and sometimes the images or patterns on it.

Knowing about coins helps us understand money, which is used to buy things like food, toys, or school supplies.

Learning to recognise coins is a first step before we learn to count money and solve simple money problems, like finding the total value of a few coins together.

Quick Revision Notes

- Indian coins include 1, 2, 5 and 10 rupee coins.
- Each coin has a number showing its value.
- Coins differ in size, colour and design.
- Coins are used to buy things, like food or toys.
- Recognising coins is a first step to counting money.
- Money helps us buy things we need.
- We can identify a coin by its printed number.
- Learning coins helps in solving money problems later.

Practice Questions

- 1 Look at real or picture coins and name their values.
- 2 Sort coins by their value.
- 3 Draw a 5 rupee coin and label its value.
- 4 Ask a family member to show you different coins.
- 5 Find two coins and add their values together.
- 6 Practice identifying coins of different sizes.
