

Shelter - Homes Around Us

Chapter 5: Shelter - Homes Around Us · Topic 1

Key Concept

Homes protect us from rain, sun, wind, and cold, keeping us safe and comfortable.

Homes are built differently depending on the weather and materials available - like houses with sloped roofs in rainy areas.

A home usually has rooms for different purposes, like a kitchen for cooking and a bedroom for sleeping.

We should keep our homes clean and take care of them, since they keep our whole family safe and comfortable.

Quick Revision Notes

- Shelter protects us from weather.
- Homes protect us from rain, sun, wind and cold.
- Homes are built differently based on weather.
- Rainy areas often have sloped roofs.
- Homes have rooms for different purposes.
- A kitchen is for cooking.
- A bedroom is for sleeping.
- We should keep our homes clean.

Practice Questions

- 1 Draw your home and label its rooms.
- 2 Discuss why your home is built the way it is.
- 3 Talk about what protects your home from rain.
- 4 Name three rooms and their uses.
- 5 Discuss how you help keep your home clean.
- 6 Compare your home to a friend's home.
