

Reading and Understanding 'A Farm'

Chapter 5: A Farm · Topic 1

Key Concept

A farm is home to many animals like cows, hens, ducks, goats, and pigs. Each animal makes a different sound — a cow moos, a hen clucks, a duck quacks, and a goat bleats.

Farms also grow crops and provide us with food like milk, eggs, and vegetables, making them an important part of our daily lives.

Farmers take care of the animals and crops every day, feeding animals, milking cows, and watering plants, which is hard and important work.

Visiting a farm or learning about farm life helps us understand and appreciate where much of our food comes from.

Quick Revision Notes

- A farm is home to animals like cows, hens, ducks and goats.
- A cow moos.
- A hen clucks and a duck quacks.
- Farms give us food like milk, eggs and vegetables.
- Farmers care for animals and crops every day.
- Farmers feed animals, milk cows, and water plants.
- Farm work is hard and important.
- Learning about farms helps us appreciate our food sources.

Practice Questions

- 1 Name three animals found on a farm.
- 2 Make the sound of a cow, hen and duck.
- 3 Draw a farm with at least three animals.
- 4 Talk about one food that comes from a farm.
- 5 List two tasks a farmer does every day.
- 6 Discuss why farm work is important for all of us.
