

Weather and Seasons

Chapter 3: Weather and Seasons · Topic 1

Key Concept

Summer is hot, with bright sunshine, while winter is cold, and we often wear warm clothes to stay comfortable.

The monsoon season brings heavy rain, which is important for farming and filling rivers and lakes with water.

Weather can change quickly, so we check things like temperature, rain, and wind to know what to expect each day.

Different seasons bring different activities, like flying kites in some seasons or wearing raincoats during monsoon.

Quick Revision Notes

- Weather changes every day and season.
- India has summer, monsoon and winter seasons.
- Summer is hot with bright sunshine.
- Winter is cold, needing warm clothes.
- Monsoon brings heavy rain.
- Monsoon rain helps farming.
- We check temperature, rain and wind for weather.
- Different seasons bring different activities.

Practice Questions

- 1 Describe today's weather.
- 2 Name India's three main seasons.
- 3 Draw a picture of your favourite season.
- 4 Discuss what clothes you wear in winter.
- 5 Talk about why monsoon rain matters for farmers.
- 6 List an activity you do in each season.
