

Animals Around Us

Chapter 4: Animals Around Us · Topic 1

Key Concept

Animals can be classified as pets (like dogs and cats), farm animals (like cows and hens), and wild animals (like lions and tigers).

Different animals eat different foods - some eat plants (herbivores), some eat meat (carnivores), and some eat both (omnivores).

We should be kind to animals, provide them food and water if we care for them, and never hurt them.

Animals give us useful things too, like milk from cows, eggs from hens, and wool from sheep.

Quick Revision Notes

- Animals: pets, farm animals, wild animals.
- Examples: dogs/cats (pets), cows/hens (farm).
- Herbivores eat plants; carnivores eat meat.
- Omnivores eat both plants and meat.
- We should be kind to animals.
- We should never hurt animals.
- Animals give us milk, eggs, wool.
- Caring for animals means giving food and water.

Practice Questions

- 1 Draw your favourite animal.
- 2 Name two pet animals and two farm animals.
- 3 Discuss what herbivores eat.
- 4 Talk about how to care for a pet.
- 5 Name one thing we get from an animal.
- 6 List two wild animals you know.
