

Fundamental Rights - Part II

Chapter 18: Fundamental Rights - Part II · Topic 1

Key Concept

The Right to Freedom of Religion allows citizens to practise, profess, and propagate any religion of their choice freely.

Cultural and Educational Rights protect minorities' rights to preserve their culture, language, and establish educational institutions.

The Right to Constitutional Remedies allows citizens to approach courts directly if their Fundamental Rights are violated, making rights enforceable.

This right is called the 'heart and soul' of the Constitution because it makes all other rights meaningful and protected.

Quick Revision Notes
