

Introduction to Paint

Chapter 4: Introduction to Paint · Topic 1

Key Concept

In Paint, we can choose different colours and use the pencil tool to draw lines and shapes.

The brush tool helps us paint larger areas with colour, just like painting with a real paintbrush.

We can also use the eraser tool to remove parts of our drawing that we want to change.

Paint lets us save our pictures so we can look at them again or show them to family and friends.

Quick Revision Notes

- Paint is a computer program for drawing.
- We can choose colours in Paint.
- The pencil tool draws lines and shapes.
- The brush tool paints larger areas.
- The eraser tool removes parts of a drawing.
- We can save our pictures in Paint.
- Saved pictures can be viewed again later.
- Paint lets us create fun artwork.

Practice Questions

- 1 Draw a simple shape using the pencil tool (real or pretend).
- 2 Colour a picture using the brush tool.
- 3 Practice using the eraser to fix a mistake.
- 4 Choose your favourite colour and describe why.
- 5 Draw a picture of your family using Paint or on paper.
- 6 Discuss how you would save your picture.
