

Practising Craft with Paper

Chapter 3: Craft with Paper · Topic 2

Key Concept

We can fold paper to make simple objects like a paper boat, a paper hat, or a fan. Folding along straight lines carefully helps make neat shapes.

We must always use scissors carefully and ask an adult for help when cutting paper.

Different types of paper, like plain paper, coloured paper, or newspaper, can be used for different craft projects, each giving a different look and feel.

Practising paper craft regularly helps improve our hand movements and patience, since folding neatly takes careful, steady hands.

Quick Revision Notes

- Paper craft uses folding and cutting.
- We can make a paper boat, hat or fan.
- Fold paper carefully along straight lines.
- Always use scissors safely with adult help.
- Different paper types give different looks to crafts.
- Coloured paper, plain paper and newspaper can all be used.
- Paper craft improves hand movements and patience.
- Neat folding takes careful, steady hands.

Practice Questions

- 1 Fold a simple paper boat.
- 2 Make a paper fan by folding.
- 3 Make a paper hat and wear it.
- 4 Decorate your paper craft with colours.
- 5 Try making the same craft with two different paper types.
- 6 Practice folding along a straight line five times.
