

Money - Recognising Coins

Chapter 6: Money - Recognising Coins · Topic 1

Key Concept

Coins come in different sizes and have numbers on them showing their value, like 1, 2, 5, or 10 rupees.

We use coins to buy small things like sweets, pencils, or bus tickets.

It's important to count coins correctly to know how much money we have.

Learning to recognise coins helps us understand how buying and selling works.

Quick Revision Notes

- Coins are used to buy things.
- Coins have different values: 1, 2, 5 and 10 rupees.
- Coins show their value with numbers.
- We use coins to buy small items.
- Sweets and pencils can be bought with coins.
- We should count coins correctly.
- Counting helps us know how much money we have.
- Recognising coins helps us understand buying and selling.

Practice Questions

- 1 Identify a 1, 2, 5 and 10 rupee coin (real or pictures).
- 2 Count a small group of coins.
- 3 Discuss what you could buy with 10 rupees.
- 4 Sort coins by their value.
- 5 Draw a coin and write its value.
- 6 Talk about a time you used money to buy something.
