

Practice and Revision - Uses of a Computer

Chapter 2: Uses of a Computer · Topic 2

Key Concept

At school, computers help us learn new things through educational games, videos, and lessons.

We can use computers to draw pictures, write stories, and even make music using special programs.

Computers help us talk to family and friends who live far away through video calls and messages.

Many people use computers at work to write, calculate, and organise their tasks efficiently.

Quick Revision Notes

- Computers help us learn at school.
- We can use computers for educational games and videos.
- Computers let us draw pictures and write stories.
- We can make music using computer programs.
- Computers help us talk to distant family and friends.
- Video calls and messages use computers.
- People use computers at work too.
- Computers help organise tasks efficiently.

Practice Questions

- 1 List three ways you could use a computer.
- 2 Draw a picture using a drawing program (or on paper, pretending).
- 3 Discuss how a video call works.
- 4 Talk about how computers help at school.
- 5 Name one thing your family uses a computer for.
- 6 Discuss a game you could play in an educational program.
