

Practice and Revision - Public Services for Community Life

Chapter 8: Public Services for Community Life · Topic 2

Key Concept

Public services are facilities provided for everyone in the community, like hospitals for healthcare and schools for education.

The police help maintain law and order and keep the community safe from crime and emergencies.

Public services like water supply, electricity, and waste collection help maintain a clean and functioning community.

These services are often provided or supported by the government, and we should use them responsibly and take care of them.

Quick Revision Notes

- Public services: hospitals, schools, police, water supply.
- They help the whole community.
- Police maintain law and order, safety.
