

Fun with Paint - Shapes and Colours

Chapter 4: Fun with Paint - Shapes and Colours · Topic 1

Key Concept

We can draw different shapes, like circles, squares, and stars, and combine them to create pictures like a house or a robot.

The fill colour tool lets us colour inside shapes, and we can choose from a colour palette to pick our favourite colours.

Changing the brush size lets us draw thick or thin lines, giving us more control over our drawings.

Combining shapes and colours in creative ways helps us make fun and imaginative artwork on the computer.

Quick Revision Notes

- We can draw circles, squares and stars in Paint.
- Combining shapes can create pictures like a house.
- The fill colour tool colours inside shapes.
- We choose colours from a colour palette.
- Changing brush size makes thick or thin lines.
- This gives more control over drawings.
- Combining shapes and colours makes fun artwork.
- Paint helps us be creative and imaginative.

Practice Questions

- 1 Draw a house using squares and triangles.
- 2 Colour your drawing using the fill tool.
- 3 Try drawing with a thick brush and a thin brush.
- 4 Combine three shapes to make a picture.
- 5 Choose three colours for your drawing.
- 6 Discuss what you enjoyed creating in Paint.
